■ HW section

- RF trace: same across Ashley-India, Ashley-RoAP, Ashley-EMEA, Ashley-LATAM SKUs.
- PCB layout: same across Ashley-India, Ashley-RoAP, Ashley-EMEA, Ashley-LATAM SKUs.
- PCBA: for any DS/SS models under the same SKU the same PCBA will be used. For example, EMEA DS/SS will share the same PCBA and the only difference is that SS model will have only one SIM slot. PCBA of each SKU is unique because the RF components will differ from SKU to SKU.
- WWAN Main antenna/ WLAN/BT/GPS/Diversity antenna type are sharing the same antenna pattern, location, matching and chipset with all SKUs.
- NFC antenna type, antenna pattern, antenna location and chipset: Only on Ashley-EMEA(Single-card). Ashley -EMEA(Dual-card) ,Ashley-India, Ashley-RoAP and Ashley-LATAM SKUs do not support NFC.

■ SW section

For this particular Motorola project all SKUs will be sharing the same SW version. The main differences exist per SKUs are related to RF Bands supported, Regarding the SW/FW, the LATAM SKU SW do not support LTE Band8. Note that specific features are enabled via MCFG depending on SIM Card inserted to device, as the lab tests are usually performed with a base FSG setup; we should not expect differences on the protocol level between all SKUs.

■ Mechanical section

There is no difference in mechanical design and materials used for all SKUs of Jeter. There are differences in terms of memory configuration and number of SIM's supported across different SKUs.

Region	RF SKU	SIM	Jeter	Memory
