Subject: Supersonics application for FCC ID:II680045
Hi Alice,

Technical review completed - below are some questions for you from the reviewer:

1. The frequency range values on the x axis of the spectral plot are not present, thus, it is impossible to determine compliance with Section 15.239(a). Please submit a new plot that has the frequency values shown.
2. Was the level of the audio input at maximum during testing of the emission bandwidth, in order to get worst-case results? If not, please retest using a high audio input level, and submit results.

Regards

Marianne
