Proxim Harmony 802.11a Access Point Professional Installation Statement

The Proxim Harmony 802.11a Access Point is certified for operation under Part 15.407 of the FCC Rules in the 5.25-5.35 GHz band, FCC ID IMK-AP5C.

The Proxim Harmony 802.11a Access Point is not intended for use by the general public, and will be sold through the Proxim sales organization to professional communications users and value added resellers, with technical staff trained by Proxim. These companies will use their technical staff to carry out installation. Professional installers will be provided with antenna installation instructions and transmitter operating conditions.

The Proxim Harmony 802.11a Access Point is certified for use with four antennas. These are offered for purchase directly from Proxim.
