Safety Information

Precautions

IMPORTANT

Please read this user's manual carefully before operating this product to ensure proper use.
For safety concerns of using this product, the following symbols are used in this manual to indicate the important information that you need to be aware.

The warning against anything which may cause death or serious injury if this is ignored.
In order to reduce the risk of injury, please pay attention to the information.

The warning against anything that may cause accidents, personal injury or damage to the car.

Describe items that you should be aware of when using the product to ensure the safety.

For safety

▲ DANGER

- Driver should not look at the display or operate the system while driving because driver could be distracted or caused accidents. Before looking at the display or operating the system, driver should stop the vehicle in a safe location and use the parking brake.
- Do not pair Bluetooth device while driving. Stop your car at a safe place before attempting to pair.
- Do not attempt to install or remove the unit by yourself. For safety concerns, please contact your dealer for advice on installation or removal of the unit.
- If the unit has any abnormalities, like no power, no sound, strange noise, or odor, turn off the device immediately and consult your dealer or nearest service center.
- Do not put foreign objects into the product. If there are foreign objects in the product, please consult your dealer or the nearest service center.
- Keep the volume in an appropriate level to be aware of road and traffic conditions while driving. This unit is designed for using exclusively in automobiles.

⚠ CAUTION

- Operating the audio system for a long period while the vehicle engine is turned off will drain the battery.
- Do not disassemble, modify or repair the product by yourself. Be sure to consult your dealer or the nearest service center.
- Do not allow liquids to get into the product. The liquids will result in electric shocks and damage the product.

👉 NOTICE

- There will be some discrepancy in the contents of this user's manual due to the technical evolution and the software improvement.
Please follow the actual function display. This manual is only for users' operating reference.

📱 About FM radio reception

- When listening to FM broadcasts in a moving vehicle, the reception conditions constantly change with building, terrain, distance from the transmitter and noise from other vehicles.
- The following phenomena of FM reception are normal and do not indicate a problem with the radio itself.

👉 NOTICE

- Fading and drifting: The range of FM is about 40 km (25 miles), except for the high-power stations. If the vehicle moves away from the transmitter, the signal tends to fade out and/or drift. This is common to FM broadcasting and might be accompanied by distortion. Fading and drifting can be minimized by tuning to a stronger signal.
- Static and flutter: When the lines of sight link between the transmitter and vehicle is blocked by large buildings etc., the broadcast sound may include static or flutter. You may also experience fluttering while driving along a tree-lined road. The effects of static and fluttering on the sound can be reduced by decreasing treble.
- Multipath: Due to the reflection characteristics of FM signals, direct and reflected signals may reach the antenna simultaneously (this is called multipath) and cancel each other. As the vehicle moves through such a spot, a momentary flutter or loss of reception may occur.
- Station swapping: When two FM stations are located close to each other in the frequency spectrum and the current signal is interrupted by an electronic dead spot caused by static or multipath, the stronger signal may automatically be selected until the original signal returns. Station swapping can also occur as the vehicle moves away from a station and towards another with a stronger signal.
- Buttons and Icons in this device will be described in bold lettering, e.g. **Radio function**, or **System Screen**.

Before Using

Precautions on using this unit

- This precision mechanical device should be handled carefully.
- Please avoid using this device at extremely high or low temperatures, which can cause malfunction or failure. Metal objects and liquids should not be in contact with the device, and hard shocks can damage the device.

Clean the unit

- Do not use volatile liquid such as alcohol or thinner for cleaning the unit, which may scratch the case or remove the screened print.
- If you use a chemical wiping cloth, follow the instructions carefully.

Clean the display

- To clean the display, wipe it with a dry soft cloth, such as silicone cloth.
- Rubbing the display with a rough cloth could scratch the surface.

Protecting the monitor

- To protect the monitor from damage, do not operate the monitor using a ball point pen or similar tool with a sharp tip.
- If you stick a film screen protector on the screen, it may interfere with touch panel operation.

Basic Operations

Operation buttons

Number	Function Key	Name	Function
1		Home	- Short press to display Home screen. - Long press to enter the screen off mode. To exit screen off mode, short press any position of the screen or any steering control switch.
2		Settings	- Short press to enter the Settings Menu screen. - Long press to switch "Day Mode" & "Night Mode".
3		Volume up	- Adjust the volume up. - The volume goes up to 25 when you keep pressing.
4		Volume down	Adjust the volume down.
5		Power	- Short press to switch Mute and Unmute. - Long press to enter the power off mode. To exit power off mode, short press any position of the screen or the steering control switch .
6	-	Illumination bar	- Enhance in-car atmosphere. The color could be adjusted in Settings menu. - Provide notifications for incoming calls and when the LWC screen is displayed.

Power-On operation

When turning on the car, the unit will be automatically turned on.

- 1 Push Start Button and turn on your car.

- 2 The head unit will appear with animation when ACC is ON.

- 3 Read the precaution messages and touch [Agree] or touch [Language] to change the display language.

Regional setup

- 1 Short press  button to display the Settings menu.

- 2 Touch [Clock].

- 3 Set each item.
