WebLink

You can connect your smartphone to WebLink either through wired or wireless. You can use WebLink to display the smartphone's screen on the unit and also use other compatible applications within WebLink.

Setup for WebLink

- 1 Download 'WebLink Host' from App Store (for iPhone) or Google Play (for Android phone).

- 'WebLink Host' is a free application.
- WebLink may not work with certain iOS or Android version.
- Please check the compatibility at: <https://helloweblink.com>

- 2 Pair your smartphone with the unit via Bluetooth.

- See **Register the Bluetooth device** (see P. 18) and **Device List Settings** (see P. 19).

- 3 WebLink screen appears. Connect to WebLink successfully.

NOTE

- 2-way touch control may not work with some Smartphone due to Smartphone's OS version or technical spec.
- Some Smartphone Video Apps or Video contents cannot be displayed to Display Audio screen due to App specification or copy-right policy.
- If you recognize that your smartphone gets hot, please stop using WebLink and disconnect USB.
- Without Bluetooth connection, some functions, such as operation, cannot be realized.

Other connection methods

USB Connection

- 1 Connect your smartphone with the unit via USB cable.
- 2 Open the WebLink application on your smartphone.
- 3 Confirm the authorization.
- 4 WebLink screen appears. Connect to WebLink successfully.

Smartphone Connection (Only Android phone)

- 1 Touch WebLink application on your smartphone.
- 2 Connect to WebLink.
- 3 Confirm the authorization.
- 4 WebLink screen appears. Connect to WebLink successfully.

Wireless Connection

- 1 Short press button.
- 2 Touch [WebLink].
- 3 Touch [Wireless setup].

- 4 Open the WebLink application on your smartphone.**
- 5 Confirm the authorization.**
- 6 WebLink screen appears. Connect to WebLink successfully.**

NOTE

- You can check "how to" tutorial in 'HelloWebLink' Website <https://helloweblink.com/> for Display Audio.
- When you use WebLink first time, WebLink terms of service are displayed on smartphone. It is necessary to agree to the WebLink terms of service to use this function.
- While displaying the WebLink, you can switch to another audio source from "AV Source Select" on the WebLink setup screen.
- While you use the WebLink function with an iPhone, WebLink is discontinued by the following operations. To resume the WebLink functions, disconnect the USB cable and try connecting it again.
 - Receiving a call
 - iPhone's screen recording function is stopped.
 - iPhone screen is turned off.
- Due to a restriction in the smartphone, there may be no audio for some apps.
- You cannot use both WebLink and iPod source at the same time.
- You cannot use both WebLink and Bluetooth Audio source at the same time.

NOTE

- After you finish using the WebLink function, stop broadcast on iPhone's screen recording function. Otherwise, iPod, Apple CarPlay and Bluetooth Audio sources may not work correctly.
- For iPhone users, due to iOS system limitations, only one application can be opened at a time. When using any navigation application, please refrain from using other applications as this will interfere with WebLink operations.
For example, if you use Waze together with Spotify, Display Audio will stop displaying Waze Navigation screen and only Spotify sound comes from Display Audio.
- If you manually put your iPhone to sleep, the connection will be lost. It is recommended that you set your iPhone's auto-lock to "Never". (Settings->Display & Brightness->Auto Lock)
- When using 'WebLink Host', available content and functions will be limited while driving.

USB

Connect to the USB device

- 1 **Connect the USB device to the USB port.** (see P. 16)
