■ Service Related

When the system cannot find an alternative service using Service Following, it tunes to a DAB service with Softlink.

(ON / OFF)

Cameras

This function is available for vehicles equipped with specific cameras, including Rear Wide Camera, LaneWatch Camera, or Multi View Camera.

For details on Multi View Camera operations, refer to the separate owner's manual.

Using the cameras

Driving Precautions

The cameras serve as auxiliary devices to help the driver check the surroundings of the vehicle. Before driving, please be sure that always perform a visual check of the vehicle's surroundings with a mirror before operating the vehicle. Please pay attention to the following notices and instructions when using the cameras.

CAUTION

- Drivers shall not depend on the cameras only. There have some difference tolerance from the images and the actual objects.
- When using the camera monitors, you should not only focus on the screen, but also use vehicle mirrors and eyes to check actual conditions.
- The position of guide line displayed on the monitor may differ from actual conditions. Please take the actual guide line as reference and check with eyes.
- When the tire size changed, the guide line position displayed on the screen may also differ.

NOTICE

- Do not use high-pressurized water column to wash the cameras to avoid damage.

- The distances between the vehicle and objects may differ from the actual distances.
- There are blind spots around the vehicle that will not be displayed on the camera monitors.

Display the camera image screen

Rear Wide Camera (RWC)

When you shift the gear to the reverse (R) position, the camera screen is automatically displayed.

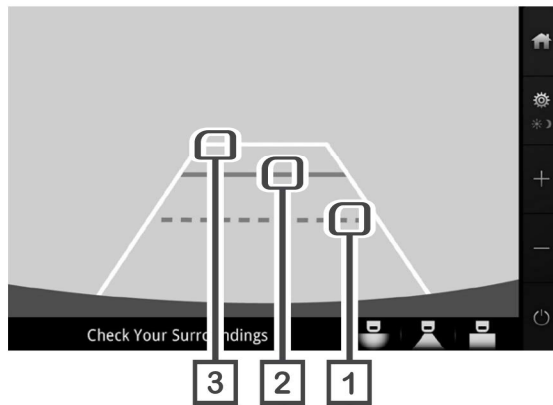

Touch view button to switch between Wide/Normal/Top views.

-  Wide View (Default)
-  Normal View
-  Top View

NOTE

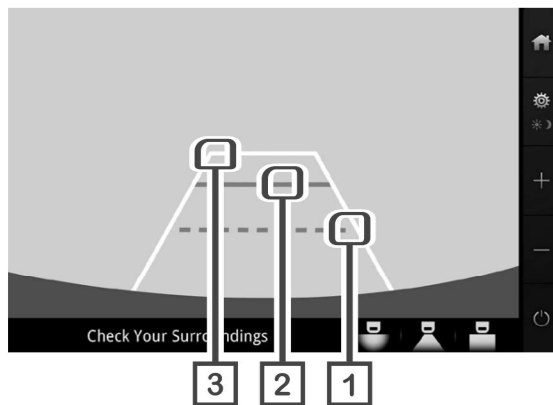

- Actual distances may vary slightly depending on the vehicle model.
- You can select to turn off guide line. (see **P. 52**)

Wide View (Default)

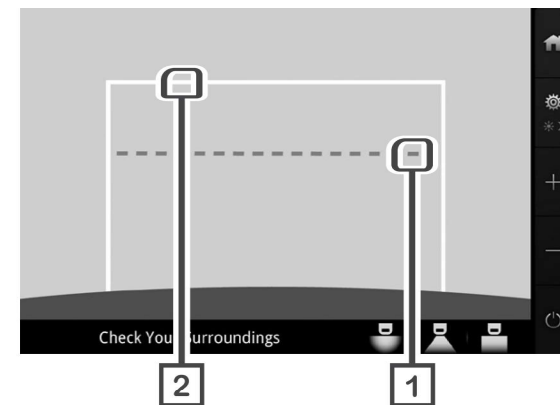

Number	Function
1	• The distance around 0.5m from the edge of the bumper.
2	• The distance around 1m from the edge of the bumper.
3	• The distance around 1.8 m from the edge of the bumper.

Normal View

Number	Function
1	• The distance around 0.5 m from the edge of the bumper.
2	• The distance around 1 m from the edge of the bumper.
3	• The distance around 1.8 m from the edge of the bumper.

Top View

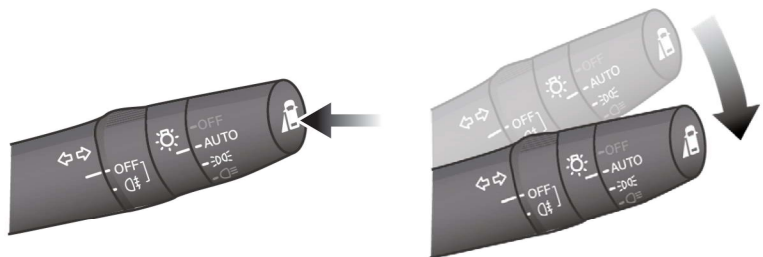

Number	Function
1	• The distance around 0.5m from the edge of the bumper.
2	• The distance around 1m from the edge of the bumper.

■ LaneWatch Camera (LWC)

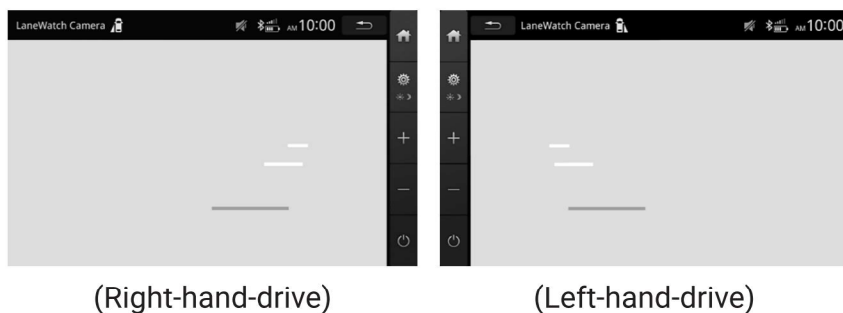

The LaneWatch assistance system enhances visibility of side rear areas. Once activated, it displays the view from a camera on the passenger-side mirror, providing you an extra way to check surroundings and improve lane change safety.

- 1 Press the LWC switch button on the tip of turn signal lever or turn on the passenger-side turn signal while in P/N/D mode. (See P.53)

- 2 The passenger side view appears.

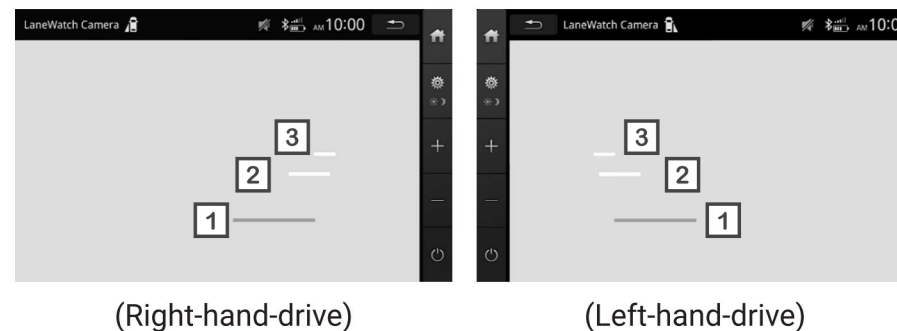

- When the LWC screen is displayed, the color of illumination bar will temporarily turn orange.
- Right-hand-drive : Flows from right to left
- Left-hand-drive : Flows from left to right

- 3 Press the LWC switch button again or pull the turn signal lever back to turn off the LWC screen.

■ LWC Reference Line

There are three lines to help you quickly judge relative distance. If an object is near **1** on the screen, it's closer to your car. If an object is near **3**, it's more distant.

NOTE

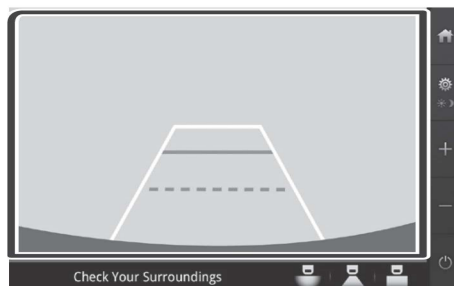

- You can select to turn off reference line. (see P. 53)

Display Control

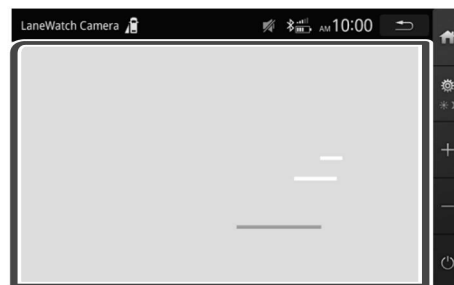

You can adjust brightness, contrast, and color of the camera images.
