Re: Part 90.203(e), Programming Capability

Dear FCC Representative

The end user of this device (Video Transmitter Model DSX-2437) will not be provided with the capability to change or program changes in frequencies pre-set by the manufacturer. Changes in frequency require physical intervention to the internal circuitry of the device and may be accomplished only by the manufacturer or the manufacturer's authorized agent using special tooling and instrumentation.

Yours very truly,
DELL-STAR TECHNOLOGIES, INC.
