CST-2005/V

Covert Voice Transmitter

DESCRIPTION

The Tactical Technologies Inc. Model CST-2005/V series is a 1 channel 100 mW VHF-FM crystal controlled voice transmitter disguised inside a Nokia 5000/6000 series cell phone battery housing.

The transmitter utilizes internal LithiumIon rechargeable batteries for its power supply, and is designed to be used as a stand alone transmitter, or it can be installed on the back of a Nokia 5000/6000 series cellphone.

BATTERY CARE

The internal batteries should be recharged using a Nokia 5000/6000 series cellphone battery charger.

Initial charging should be for a period of 5 hours. Thereafter, a full charge should take approximately 3 hours.

The battery may be charged in a stand-alone drop-in charger, or it may be charged while attached to a Nokia Cellphone.

TRANSMITTER OPERATION

- 1.) CST-2005/V comes with a recessed ON/OFF switch located on the flat side of the transmitter housing.
- 2.) Slide switch toward the EDGE of the transmitter to turn the unit ON.
- 3.) Test Operation using appropriate receiver.
- 4.) Slide switch toward the CENTER of the transmitter to turn the unit OFF.

The transmitter is equipped with an internal microphone and antenna.

On/Off Switch Location:

OPERATING NOTES:

- 1.) Do not immerse the unit in water.
- 2.) Always fully charge the unit before any operation.
- 3.) Make sure the On/Off switch is in the OFF position when your operation is complete.
