ADMINISTRATIVE DATA

PURPOSE OF TEST:

To evaluate the ElectroMagnetic Emission (EME) characteristics of the Equipment Under Test with respect to Part 15 of the Federal Communications Commission (FCC) Rules for Class "B" Information Technology Equipment (ITE).

SCOPE OF TEST:

Measurement of radiated emissions.

EQUIPMENT UNDER TEST (EUT):

Model Number: **RX500**

Serial Number: NSN

CONTRACT:

Purchase Order Number: 11338

TEST PERIOD:

4 May 2000

TEST FACILITY:

Radiation Sciences Incorporated (RSI), EMC Test Laboratory, located at 3131 Detwiler Road, Harleysville, Pennsylvania 19438.

TEST PERSONNEL AND COORDINATORS:

Radiation Sciences Inc.

C. Kosiorek
R. Smith

Tactical Technologies, Inc.

Jeff Olsen

SUMMARY OF TEST RESULTS

The Tactical Technologies Model RX500, configured as described herein, FULLY COMPLIES WITH THE REQUIREMENTS SET FORTH IN FCC PART 15 FOR CLASS "B" INFORMATION TECHNOLOGY EQUIPMENT (ITE).

1.0 INTRODUCTION

This document is a report of tests to determine the ElectroMagnetic Interference (EMI) characteristics of the **RX500 Receiver**, manufactured by **Tactical Technologies, Inc.**

The purpose of the tests was to evaluate the EMI characteristics of the test sample with respect to FCC Part 15 for Class "B" Information Technology Equipment (ITE).

Test setups and procedures are described in **RSI's Test Procedure 4963E** (see Appendix A) and test results are summarized herein on graphs.

All test procedures used meet the requirements of the Office of the American National Standards Institute Procedures C63-4: "Methods of Measurement of Radio-Noise Emission from Low-Voltage Electrical and Electronic Equipment in the Range of 9kHz to 40GHz", dated 17 July 1992.

2.0 DESCRIPTION OF THE TEST SAMPLE:

Tactical Technologies Model RX500 is a desktop receiver for TX Model Transmitters.

2.1 Test Setup

The **RX500** test sample was tested for radiated emissions at 3 meters. The antenna was raised up and down.

Prior to formal test, receiver was scanned for emissions in a shield room.

Section 3 contains a list of the test equipment utilized.

**3.0 TEST INSTRUMENTATION**

4.0 TEST RESULTS

4.1 Radiated Emission Measurements

Radiated emission measurements were recorded with the **RX500** placed on a table. A photograph of the test setup is shown in Figure 1. The results of radiated emissions measurements are illustrated on a graph, Figure 2 and data sheet 1, Figure 3. Radiated emissions were measured with the antenna in the horizontal and vertical planes at a distance of 3 meters in height and the test sample was rotated as required. The unit was scanned using a Spectrum Analyzer to locate its emission frequencies.
