May 14, 2015

To whom it may concern:

The transmitter circuitry and circuit board is identical in each model. The primary difference between these two models is the way that they are used by the consumer. A02293 is intended for use in a dry environment and B02293 is intended for use in a wet environment. However, the functions of the supporting PCBs are the same and the transmitter characteristics are identical.

Sincerely,

Garmin International, Inc.
