Olathe, Kansas 66062
P: 913-397-8200 F: 913-397-8282

Federal Communications Commission
Authorization and Evaluation Division
1435 Oakland Mills Road
Columbia, MD 21046

Date: January 29, 2015

SUBJECT: FCC Application for IPH-02767

To Whom It May Concern:

Garmin wishes to place the FCC ID label inside the battery compartment because the device is small with curved surfaces and has limited available real estate. The battery compartment is an area requiring repeated user attention as operation of the unit requires user replacement of the battery periodically. The battery compartment is easily accessible and the battery is removable by the user without the use of any special tools. The identifier label will be readily viewable each time the battery is removed or replaced.

In addition, the FCC ID is also prominently shown on the product packaging and instructions are provided to the user on the location of the FCC ID on the device. This location will help ensure the longevity of the label as this equipment may be in service in harsh environments.

Sincerely,

A handwritten signature in blue ink, appearing to read "Van Ruggles".

Van Ruggles
Director, Quality Assurance and Certification
