⚠ WARNING

Failure to heed the following warnings could result in an accident or medical event resulting in death or serious injury.

Battery Warnings

A lithium-ion battery is used in this device.

If these guidelines are not followed, batteries may experience a shortened life span or may present a risk of damage to the device, fire, chemical burn, electrolyte leak, and/or injury.

- Do not expose the device or batteries to fire, explosion, or other hazard.
- Do not disassemble, modify, remanufacture, puncture, or damage the device or batteries.
- Do not remove or attempt to remove the non-user-replaceable battery.

Device Warnings

- To avoid possible device damage, do not leave the device exposed to a heat source or in a high-temperature location, such as in the sun in an unattended vehicle.
- Do not operate or store the device for an extended time period outside of the applicable temperature range listed in the printed manual in the product packaging.
- Do not use a power cable, data cable, and/or power adapter that is not supplied by Garmin® or is not properly certified.
- Do not use a third-party wireless charger (not included) that is incompatible with the device or is not properly certified.

Health Warnings

- If you have a pacemaker or other internal electronic device, consult your physician before using a heart rate monitor.
- The optical wrist heart rate monitor and pulse oximeter emit lights and flash occasionally. Consult your physician if you have epilepsy or are sensitive to bright or flashing lights.
- Always consult your physician before beginning or modifying any exercise program.
- The device, accessories, heart rate monitor, pulse oximeter, and related data are intended to be used only for recreational purposes, not medical purposes, and are not intended to diagnose, monitor, treat, cure, or prevent any disease or condition.

- The heart rate and blood oxygen saturation readings are for reference only, and no responsibility is accepted for the consequences of any erroneous readings.
- While the optical wrist heart rate monitor and pulse oximeter technologies typically provide accurate estimates of a user's heart rate and blood oxygen saturation respectively, there are inherent limitations with the technologies that may cause some of the readings to be inaccurate under certain circumstances, including the user's physical characteristics, device fit and position, and type and intensity of activity.
- Activity trackers rely on sensors that track your movement and other metrics. The data provided by these devices is intended to be a close estimation of your activity and metrics tracked, but may not be completely accurate.

Safety and Tracking Warning

The assistance feature allows you to send your location to an emergency contact. This is a supplemental feature and should not be relied upon as a primary method to obtain emergency assistance. The Garmin Connect™ app does not contact emergency services on your behalf.

The incident detection feature is only available during certain outdoor activities. For more information, see the device owner's manual.

Bicycle Warnings

- Always use your best judgement, and operate the bicycle in a safe manner.
- Make sure your bicycle and hardware are properly maintained and that all parts are correctly installed.

Failure to heed the following cautions could result in minor or moderate injury, or property damage.

Skin Irritation

Some users may experience skin irritation after prolonged use of the watch, especially if the user has sensitive skin or allergies. If you notice any skin irritation, remove the watch and give your skin time to heal. To help prevent skin irritation, ensure the watch is clean and dry, and do not overtighten the watch on your wrist. For more information, go to garmin.com/fitandcare.
