RE: Class II Permissive Change for IPH-04349

To whom it may concern:

Pursuant to 47 CFR § 2.1043, this application for a Class II Permissive Change is submitted under FCC ID: IPH-04349. The change consists of the addition of a host device FCC ID: IPH-04998 to the scope of the existing module grant.

Additionally, the Class II Permissive change is submitted to include portable use of the module in the new host (FCC ID: IPH-04998). The module was certified by Limited Module Approval for mobile use, including a MODLIM PAG, KDB inquiry number 510849.

The integration does not require any hardware modifications to the module and the RF output characteristics remain consistent with those evaluated in the original certification. The host device incorporates an inverted F PCB antenna supporting 2.4GHz operation for Bluetooth Low Energy (BLE) and ANT.

Compliance with all applicable FCC Part 15 requirements has been verified through representative testing in the integrated configuration. Test reports, including a report for Specific Absorption Rate (SAR), are included in this application.

Sincerely,

A handwritten signature in black ink, appearing to read "Daniel C. Irish".
