

GARMIN VHF 725, FCC SAR/MPE Evaluation

May 24, 1999

To Whom It May Concern:

The VHF 725 is a 5 watt, push to talk, FM, marine band VHF transceiver that transmits in the 156.025 to 157.425 MHz band. Given the short duty cycle of transmissions the device is judged to be in compliance with the SAR/MPE requirements. In accordance with OET Bulletin 65, 97-01, the VHF 725 does not require routine evaluation for SAR/MPE compliance.
