CETECOM Change Declaration

Company Name: Garmin International

Model Name: AA3111

Previous HW Version: fleet 790 HW version 0

Previous SW Version: 2.30

Current HW Version: fleet 770 HW version 0

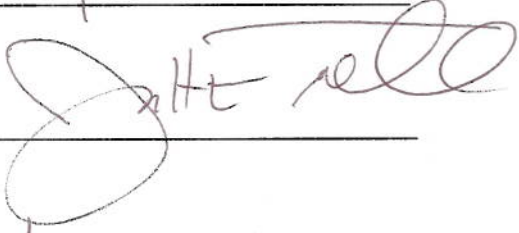

Current SW Version: 2.30

List of Changes:

Description of Change	Reason for Change	How the Change is Implemented
Design the fleet 770 such that it does not have the cellular modem or rear camera that are in the fleet 790	Re-use the HW and SW platform to provide cost savings and other efficiencies	The PCBs between the 790 and 770 are the same with the cellular modem and rear camera not being populated on the 770. The cellular antenna is not placed on the 770 and the 770 rear case is slightly different to not include the opening for the rear camera. Other radios and transmitters share the same design and implementation.

* No other changes were made to the device.
