Columbia, MD 21046

ATTN: Mr. Frank Coperich

RE: Certification Application for FCC ID: **J3OEAG2919**

Dear Frank,

In fulfillment of the requirements to obtain a CERTIFICATION grant of equipment authorization for equipment operating under 47 CFR Part 24, Subpart E--Broadband PCS, the Wireless Technology Group (WTG) of Xircom, Inc. [formerly Omnipoint Technologies, Inc. (OTI)] respectfully submits for your consideration the attached filing for FCC ID: **J3OEAG2919**. Included in this electronic submittal are Form 731, Application for Equipment Authorization; Form 159, Remittance Advice and payment in the amount of \$610.00; and the documentation and technical information required by 47 CFR Part 2, Subpart J--Equipment Authorization Procedures, Section 2.1033 *Application for Certification*.

Pursuant to Section 0.459 of the Commission's Rules, Xircom WTG respectfully **requests confidentiality** for the following exhibits, and that they be withheld from public inspection at the conclusion of the authorization process:

Exhibit 4	Tune-Up Procedure
Exhibit 5	Schematic Diagrams

These exhibits contain material considered to be trade secrets of Xircom WTG and, as considerable effort has been expended in the development of this product, it is imperative that our competitors do not receive an unfair advantage in the marketplace at the expense of Xircom WTG.

Finally, please note that although this device is capable of operating at both 900 MHz and 1900 MHz, it will only transmit within those bands where commercial GSM networks exist. Thus, within North America, this device will only transmit in the 1900 MHz PCS band (1850 – 1910 MHz) as detailed in the accompanying documentation.

Should you require any further or additional information to process this application, please do not hesitate to contact me directly. I can be reached by any of the following means:

Telephone:	(719) 884-2751
Fax::	(719) 266-8521
email:	jyoungman@omnipoint.com

Sincerely,

James Youngman
Compliance Technical Lead
Xircom Wireless Technology Group
