

## AppendixF Safety and Agency Regulatory Notices

**Aim of this appendix** This appendix provides basic Safety Information on Alcatel's **Speed Touch™** product.  
Prior to using the **Speed Touch™** product, read this appendix carefully.

**Reading all instructions** Follow all warnings and instructions marked on the product.

**In this appendix** This chapter covers the following topics:

| Topic                                  | See |
|----------------------------------------|-----|
| Safety Instructions                    | F.1 |
| European Declaration of Conformity     | F.2 |
| Radio Frequency Interference Statement | F.3 |
| Canadian Class B Notice                | F.4 |

**STORE THESE INSTRUCTIONS CAREFULLY**

---

**Directive** Unless expressly and unambiguously approved by Alcatel, you may not:

- ▶ disassemble, de-compile, reverse engineer, trace or otherwise analyse the equipment, its content, operation, or functionality, or otherwise attempt to derive source code (or the underlying ideas, algorithms, structure or organization) from the equipment or from any other information provided by Alcatel, except to the extent that this restriction is expressly prohibited by local law;
- ▶ copy, rent, loan, re-sell, sublicense, or otherwise transfer or distribute the equipment to others;
- ▶ modify, adapt or create a derivative work of the equipment;
- ▶ remove from any copies of the equipment any product identification, copyright or other notices;
- ▶ disseminate performance information or analysis (including, without limitation, benchmarks) from any source relating to the equipment.

Such acts not expressly approved by Alcatel will result in the loss of product warranty and will invalidate the user's authority to operate this equipment.

---

## F.1 Safety Instructions

- 
- Climatic conditions** The **Speed Touch™** product equipment is intended for:
- ▶ In-house stationary desktop use; the maximum ambient temperature may not exceed 40°C (104°F).
  - ▶ It must not be mounted in a location exposed to direct or excessive solar and/or heat radiation.
  - ▶ It must not be exposed to heat trap conditions and must not be subjected to water or condensation.
  - ▶ It must be installed in a Pollution Degree 2 environment.
- 

**Installation** This device must be installed so that a separation distance of at least 20 centimeters is maintained between the internal radiating antenna and the body of the user in order to meet FCC RF exposure guidelines.

---

**Cleaning** Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.

---

**Water and moisture** Do not use this product near water, for example, near a bathtub, wash bowl, kitchen sink, laundry tub, in a wet basement or near a swimming pool.

---

**Power supply adapter** The **Speed Touch™** product comes with a portable power supply adapter.

Due to the special characteristics of the output of the class II AC adaptor, only use the models or equivalent listed in the power adapter table in this User's Guide.

---

---

**Power sources** The powering of this product must adhere to the power specifications indicated on the marking labels. If you are unsure of the type of power supply to your home, consult your product dealer or local power company.

The mains socket outlet must be close to the equipment and easily accessible.

The **Speed Touch™** product equipment is not intended to be connected to an IT-type power system.

---

**Power cord protection** Do not allow anything to rest on the power cord. Do not locate this product where the cord will be subject to persons walking on it.

---

**Overloading** Do not overload wall (mains) outlets and extension cords as this increases the risk of fire or electric shock.

---

**Servicing** To reduce the risk of electric shock, do not disassemble this product. None of its internal parts are user-replaceable; therefore, there is no reason to access the interior. Opening or removing covers may expose you to dangerous voltages. Incorrect reassembly could cause electric shock if the appliance is subsequently used.  
If service or repair work is required, take it to a qualified service dealer.

---

**Wireless RF antennas** The long-term characteristics or the possible physiological effects of radio frequency electromagnetic fields associated with this equipment have not been evaluated.

---

**Damage requiring service**

Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:

- ▶ When the power supply cord or plug is damaged or frayed.
  - ▶ If liquid has been spilled into the product.
  - ▶ If the product has been exposed to rain or water.
  - ▶ If the product does not operate normally.
  - ▶ If the product has been dropped or damaged in any way.
  - ▶ If the product exhibits a distinct change in performance.
- 

**Modem/Telephone use**

Avoid using a modem/telephone (other than a cordless type) during an electric storm. There is a slight risk of electric shock caused by lightning.

Do not use the telephone to report a gas leak in the vicinity of the leak.

If telephone service is required on the same line, a central splitter, or distributed filter(s) must be installed for optimal DSL performance.

Depending on your DSL configuration and type of splitter/filters, installation must be carried out by qualified service personnel.

Consult your telephone service company or DSL service provider for instructions.

---

**Modifications**

Changes or modifications not expressly approved by Alcatel could invalidate the users authority to operate this equipment.

---

**STORE THESE INSTRUCTIONS CAREFULLY**

## F.2 European Community Declaration of Conformity

---

Products with the **CE** marking comply with both EMC and Low Voltage Directives issued by the Commission of the European Community.

---

### **EC Declaration of Conformity**

A copy of the European Community Declaration of Conformity is provided in your **Speed Touch™** product shipping box.

---

## F.3 Radio Frequency Interference Statement

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against such interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy. If not installed and used in accordance with the instructions, it may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment ON and OFF, the user is encouraged to try correct the interference by one or more of the following measures:

- ▶ Reorient or relocate the receiving antenna
- ▶ Increase the separation between the equipment and receiver
- ▶ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- ▶ Consult the dealer or an experienced radio/television technician for help.

This equipment complies with Part 68 of the FCC Rules. On the back of this equipment is a label that contains, among other information, the FCC certification number (FCC ID) and Ringer Equivalence Number (REN) for this equipment. If requested, this information must be provided to the telephone company.

An FCC compliant telephone cord and modular plug is provided with this equipment. This equipment is designed to be connected to the telephone network or premises wiring using a compatible modular jack that is Part 68 compliant.

The Ringer Equivalence Number (REN) is used to determine the quantity of devices that may be connected to the telephone line. Excessive RENs on the telephone line may result in the devices not ringing in response to an incoming call. Typically, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line (as determined by the total RENs) contact the local telephone company.

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice is not practical, the telephone company will notify the customer as soon as possible. Also you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The telephone company may make changes to its facilities, equipment, operations or procedures that could affect the operation of the equipment. If this happens the telephone company will provide advance notice so you can make the necessary modifications to maintain uninterrupted service.

If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved. Connection to party lines is subject to state tariffs (contact the state public utility commission, public service commission or corporation commission for information).

**No repairs can be performed by the customer, if you experience trouble with this equipment for repair or warranty information, please contact: (919) 850-1231 for locations in North America.**

## F.4 Canadian DOC Class B Notice

---

### **Notification of Canadian RF Interference Statements**

This digital apparatus does not exceed the Class B limits for radio noise emissions from digital apparatus as set out in the radio interference regulations of the Canadian Department of Communication.

Le présent appareil numérique n'émet pas de bruits radioélectriques dépassant les limites applicable aux appareils numérique de classe B prescrites dans le règlement sur le brouillage radioélectrique édicté par le Ministère des Communications du Canada.
