FCC COMPLIANCE REPORT OF MEASUREMENTS ON KNOGO NORTH AMERICA RFID TRANSMITTER MODEL NO. EC1A FCC ID: JHD-CEN2

CUSTOMER NAME: North American Technical Services

CUSTOMER P.O.: 0498

DATE OF REPORT: May 7, 1998

TEST REPORT NO.: R-7513-2

TEST START DATE: April 17, 1998

TEST FINISH DATE: April 28, 1998

TEST TECHNICIAN: D. Cortes

TEST ENGINEER: T. Schneider

SUPERVISOR: R.J. Reitz

REPORT PREPARED BY: L. Anderson

GOVERNMENT SOURCE INSPECTION: Not Applicable

Our letters and reports are for the exclusive use of the customer to whom they are addressed, and their communications to any other or the use of the name of RETLIF TESTING LABORATORIES must receive our prior written approval. Our letters and reports apply only to the sample tested and are not necessarily indicative of the qualities of apparently identical or similar products. The reports and letters and the name of RETLIF TESTING LABORATORIES or insignia are not to be used under any circumstances in advertising to the general public. This test report shall not be reproduced, except in full, without the written approval of RETLIF TESTING LABORATORIES.

CERTIFICATION AND SIGNATURES

We certify that this report is a true report of the results obtained from the tests of the equipment stated. We further certify that the measurements shown in this report were made in accordance with the procedures indicated and vouch for the qualifications of all Retlif Testing Laboratories personnel taking them.

Thomas J. Schneider
EMC Test Engineer
NVLAP Approved Signatory

Richard J. Reitz
Laboratory Manager
NVLAP Approved Signatory

NON-WARRANTY PROVISION

The testing services have been performed, findings obtained, and reports prepared in accordance with generally accepted testing laboratory principles and practices. This warranty is in lieu of all other warranties, either express or implied.

NON-ENDORSEMENT

This test report contains only findings and results arrived at after employing the specific test procedures and standards listed herein. It is not intended to constitute a recommendation endorsement, or certification of the product or material tested. This report must not be used by the client to claim product endorsement by NVLAP or any agency of the U.S. Government.

APPLICANT Identec, Ltd. Mercantile Road Rainton Bridge Industrial Estate Houghton-le -Spring, County Durham England DH4 5PH	MANUFACTURER SAME
---	---------------------------------

TEST SPECIFICATION: FCC Rules and Regulations Part 15, Subpart C, Para. 15.209

TEST PROCEDURE: ANSI C63.4:1992

TEST SAMPLE DESCRIPTION

BRANDNAME: KNOGO MODEL: EC1A

TYPE: RFID Transmitter

POWER REQUIREMENTS: 12 VDC Derived from Stancor # STA-4812A AC Adapter

FREQUENCY OF OPERATION: 153.6 kHz

TESTS PERFORMED

Para. 15.209(a), Radiated Emissions

Para. 15.207(a), Conducted Emissions

Duty Cycle Determination

I HEREBY CERTIFY THAT: The measurements shown here were in accordance with the procedure indicated and that the energy emitted by this equipment was found to be within the limits applicable. I assume full responsibility for the accuracy and completeness of these measurements and vouch for the qualifications of all persons taking them.

I FURTHER CERTIFY THAT: On the basis of the measurements made, the device tested is capable of operation in compliance with the requirements of Part 15 of the FCC Rules under normal use and maintenance.

REPORT OF MEASUREMENTS

Applicant: KNOGO North America
Device: RFID Transmitter
FCC ID: JHD-CEN2
Power Requirements: 12 VDC derived from Stancor # STA-4812A AC Adapter
Applicable Rule Section: Part 15, Subpart C, Section 15.209

DETERMINATION OF DUTY CYCLE

The unit's RF output was directly coupled to the input of the spectrum analyzer. The analyzer was set for a frequency span of 0Hz. The sweep time was then adjusted in order to display one full pulse train. The transmitter on time was then summed and compared to the time for one full cycle in order to obtain the duty cycle.

$$\text{Duty Cycle} = 48.2 \%$$

SPECTRUM ANALYZER DESENSITIZATION CONSIDERATIONS

Due to the nature of the emissions being measured, care was taken to ensure that the resolution bandwidth of the spectrum analyzer was adequate to provide accurate measurements. The following formula was utilized:

$$\text{Pulse Desensitization} = 20 \text{ Log (PW * BW * 1.5)}$$

Setting pulse desensitization equal to zero and utilizing the minimum observed pulse width of 1200 microseconds yields a minimum required bandwidth of 555 Hz. FCC specified bandwidths of 10kHz were utilized for 9 kHz to 30 MHz and 100 kHz for 30 MHz to 1 GHz for all measurements taken.

Retlif Testing Laboratories

Test Report No. R-7513-2
FCC ID: JHD-CEN2

REPORT OF MEASUREMENTS (continued)

GENERAL NOTES:

1. All readings were taken utilizing a Quasi-Peak detector function, except for 110 kHz to 490 kHz range which was measured in Peak. All measurements below 30 MHz were taken at a test distance of 10 meters and all measurements from 30 MHz to 200 MHz were taken at a test distance of 3 meters.
2. The duty cycle was applied to the peak readings in order to determine the average value of the emissions.
3. The frequency was scanned from 9 kHz to 200 MHz. All emissions not reported were more than 20 dB below the specified limit.

MODIFICATIONS:

1. During conducted emissions testing a ferrite, Fair-Rite P/N: 0443164151 was placed on the power lead of the unit.
