

Operational Description

The EUT (Wireless JoyStick) includes two individual parts. One is the wireless Joystick which is held on the user's hand, the other is USB transceiver which is connected with the PC. The wireless joystick is powered by 6VDC battery and USB transceiver is 5VDC from PC.

This device is a Frequency Hopping device with 79 hopping frequencies. The declared output power is only 1.06mW. The hopping rate as well as the protocol is not the same as bluetooth, so it could not link with the bluetooth device.
