

FCC ID: JNZB00036

Date: 07/22/2021

● **According to “784748 D01 Labelling Part 15 & 18 Guidelines v08”**

If the device is unquestionably too small for the FCC ID to be readable (smaller than 4-6 points), the FCC ID may be placed in the user manual. However, it must be determined that the device itself is too small - the label area allocated to the FCC ID may not be reduced because of over crowded identification of other product and regulatory information. Justification for placing the FCC ID in the manual must be submitted with the initial application for certification for review and approval.

- The product is a wireless Earphone, the product dimension is too small and the mechanical is the rounded/ radius design. The product characteristics do not permit direct marking of the device.

- Logitech confirms FCC ID would be placed in the flyer, and users can see compliance information when they choose products on the retail store and open the product package.

- The above has been accepted via a KDB inquiry which may be found in the operational description exhibit.

Sincerely yours,

A handwritten signature in black ink that reads "Paul Zahra". The signature is written in a cursive, flowing style.
