Logitech® Wireless Keyboard K230

The compact keyboard that brings fun to the basics

Compact design, designed to look good

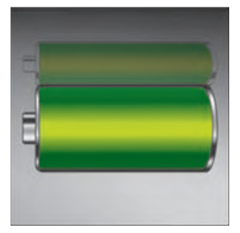
Save space without missing a thing. The compact keyboard is about 36% smaller than our standard keyboards but still has all the standard keys—so doing the things you love is as easy as ever.

Powerful, reliable connections

You'll enjoy virtually no delays or dropouts up to 10 meters (33 feet) away—even in the busiest wireless environments—thanks to the tiny plug-and-forget Logitech Unifying receiver with Logitech Advanced 2.4 GHz wireless connectivity.[1]

Power up for years (2-year battery life)

With a 2-year battery life and auto-sleep, you can catch up on Facebook®, email friends and write Yelp reviews for years without the hassle of changing batteries.[2]



Sleek style you can customize

Want to make this sleek little keyboard a little more "you"? The battery door on top of the keyboard doubles as a fun design element with light gray, purple and blue options you can swap in to suit your mood or décor.

Easy setup

Your laptop + Logitech = comfort
Yes, your laptop can be as comfortable as it is convenient. With Logitech laptop accessories you can create a clutter-free workspace that feels "just right." Pick the perfect mouse for precise cursor control. Add a keyboard with number pad and say "so long" to cramped typing, sweaty palms and accidental touchpad input. Your arms and wrists may thank you.
