Re: Confidentiality for submittal information regarding FCC ID number JPADMEL2

PRODUCT: Aviation Services Transmitter (Distance Measuring Equipment).

Dear Sirs:

Short-term

Pursuant to DA 04-1705 of the Commission's public notice, we request **short-term confidential treatment** for the following information until 45 days after the Grant Date of Equipment Authorization in order to ensure sensitive business information remains confidential until the actual marketing of the device:

External Photos, file Selex 1118A DME External Photos.jpg

Internal Photos, file Selex 1118A DME Internal Photos.jpg

Test Setup Photos, file Selex 1118A DME Test Setup Photos.jpg

User Manual, file Technical Description manual.pdf

User Manual, file DME Low Power Installation tune up manual.pdf

Permanent

SELEX SISTEMI INTEGRATI INC. requests that the material in the **Parts List, Schematics, block diagram, and Operational Description** be withheld from public disclosure in accordance with Section 0.459 of the Commissions Rules, 47 C.F.R. 0.459, following grant of the application. In support of this request, SELEX SISTEMI INTEGRATI INC. submits the following:

Parts List, file PL030802-0001 parts.jpg

Schematic, file 030802-9001 schematic.jpg

Block Diagram, file Selex 1118A DME Block Diagram.jpg

Operational Description, file Selex 1118A DME Operation Theory.jpg

Operational Description, file TSO30802-0001 Tune.jpg

1. Identification of the specific information for which confidential treatment is sought:

The materials set fourth in the Operational Description, Parts List, block diagram, and Schematics, which are segregated from the non-confidential exhibits of the application, are those for which confidentiality is sought.

2. Identification of the Commission proceeding in which the information was submitted or a description of the circumstances giving rise to the submission:

The proceeding is that involving the application for equipment authorization (certification) under FCC ID No: **JPADMEL2**

3. Explanation of the degree to which the information is commercial or financial, or contains a trade secret or is privileged:

This material includes a detailed theory of operation, circuit diagrams, (schematic diagrams) and detail Parts List. As such, this material is treated as highly confidential business information.

4. Explanation of the degree to which the information concerns a service that is subject to competition:

The material for which confidentiality is sought is employed in the design and manufacture of this transmitting equipment that is offered on a highly competitive basis. Customers for this equipment have a variety of competing sources.

5. Explanation of how disclosure of the information could result in substantial competitive harm:

Disclosure would, in effect, give away the fruits of the labors of SELEX SISTEMI INTEGRATI INC.'s engineering personnel, who have designed the equipment and the manufacturing process. Disclosure would also offer competitors additional unwarranted insight into the state of the product development, thereby allowing competitors an advantage, not available to SELEX SISTEMI INTEGRATI INC.

6. Identification of any measures taken by the submitting party to prevent unauthorized disclosure:

The information for which confidential treatment is sought is kept confidential by SELEX SISTEMI INTEGRATI INC. and not made available to third parties except pursuant to non-disclosure agreements.

7. Identification of whether the information is available to the public and the extent of any previous disclosure of the information to third parties:

To the knowledge of those preparing this application, the information has not been disclosed publicly heretofore. While the general theory of operation of this equipment has been the subject of numerous disclosures in industry and standards groups as well as in rule making proceedings of the FCC, the protection sought is narrowly drawn and pertains to certain specific implementations of this radio technology.

8. Justification of the period during which the submitting party asserts that the material should not be available for public disclosure:

This material should not be disclosed for at least 25 years. While improvements in design are made relatively frequently, disclosure of the design information would lead to insights into both design and manufacturing techniques that could have an adverse competitive effect for many years to come. This equipment is designed for commercial, industrial, and governmental applications. As such, unlike most consumer equipment, this equipment could be used for more than a decade in some cases. As such, it is important that the design not be made available to unauthorized persons who might attempt to use knowledge of the design to compromise the applications for which the equipment will be employed.

Should you require any further information, please contact the undersigned.
Thank you for your consideration in this matter.

Sincerely,

Scot Rogers
