Introducing the RadioRA Cordless Tabletop Master Control

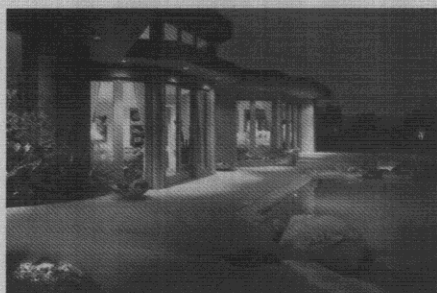

JPZ0009

RAMC-10C-WH

Available in white,
10-button styles only.

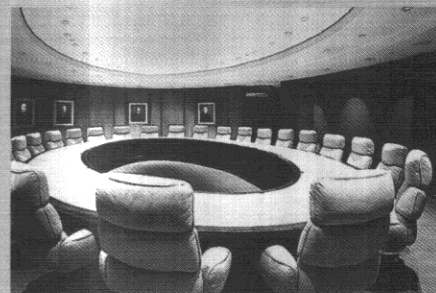

The world's first radio frequency battery-powered master control for a lighting control system.

The Cordless Tabletop Master Control is perfect to use when entertaining poolside, at the hot tub, in the cabana, or on the patio, and features no line-of-sight limitations.

Residential applications include home theaters, family rooms, and dining rooms. The Cordless Tabletop Master Control requires two AAA batteries and is ideal for people with limited mobility.

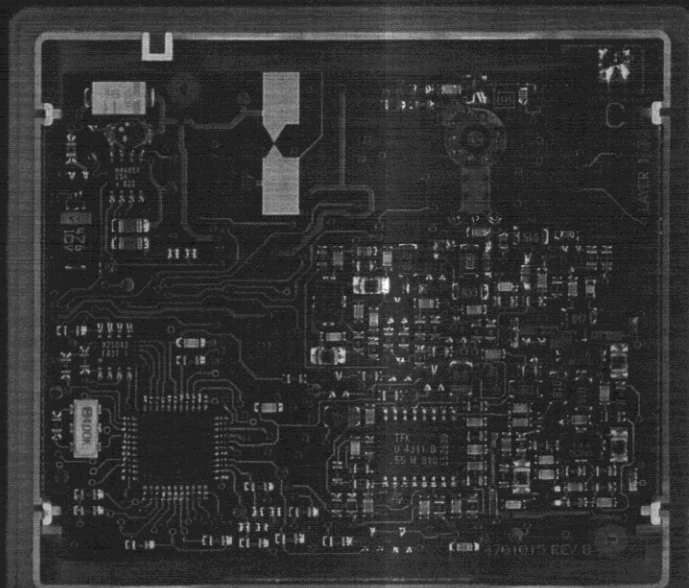

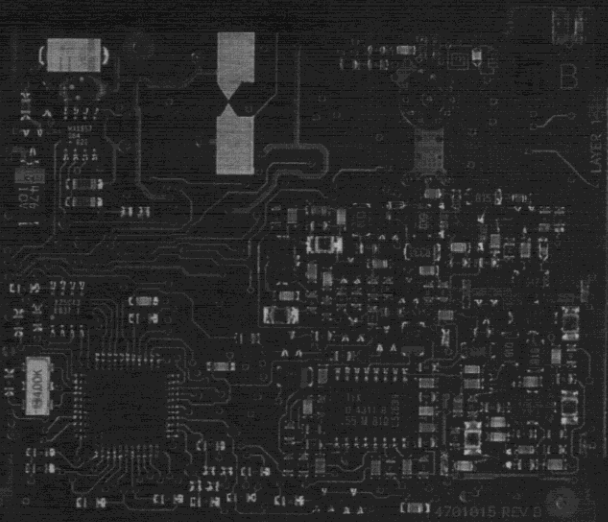

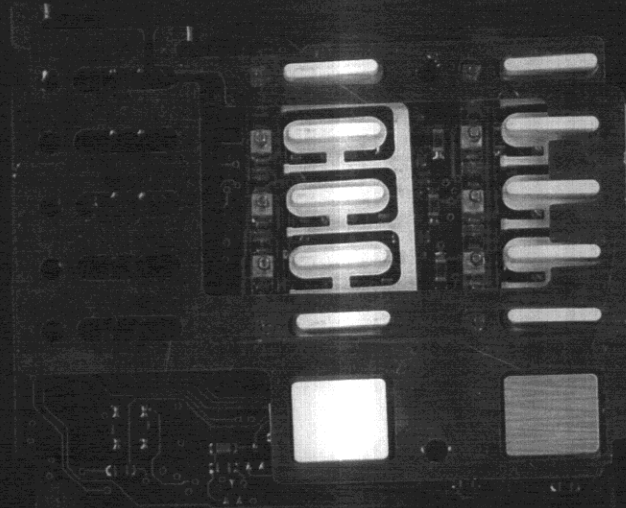

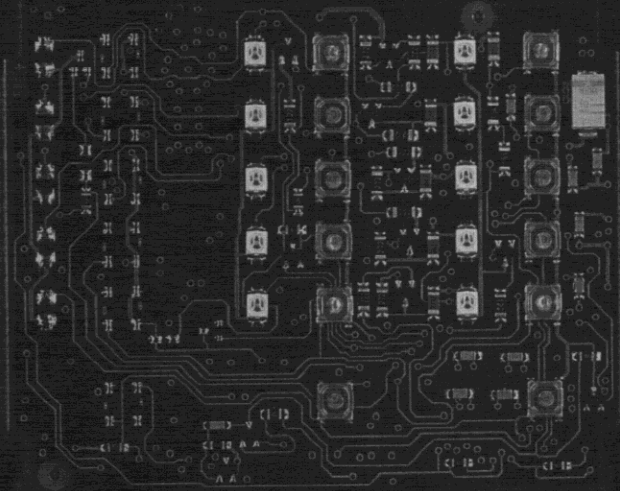

Use the Cordless Tabletop Master Control in executive suites, board rooms, and conference rooms to alter the lighting for your multi-media presentations.
