Subject: Class II changes to JPZ0075

Identifier: FCC ID: JPZ0075
IC: 2851A-JPZ0075

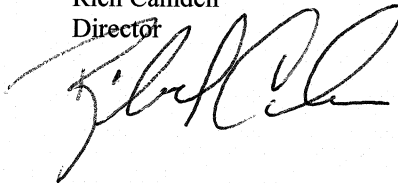

Equipment class: Remote Control Device – RF Controller

Additional modifications were made to the PWB that accommodated circuitry to control a LED to act as a nightlight, to improve the battery life and present a more consistent nightlight output. The RF components have not been altered. The LED Nightlight circuit is powered directly from the battery, and is completely separate from the RF and Microprocessor components.
