**Change Contents:** [detail reasons for permissive change here]

Original grant did not include the mode of operation for  
"commissioning" which uses a slightly reduced fundamental power,  
but the same duty cycle as the normal operation mode of operation.

Product was retested in the commissioning mode of operation with test  
report WIRA137382. Class2 permissive change is submitted to  
capture this previously untested mode of operation

Sincerely,

Daniel J Osle
