This letter is to confirm the following regarding the similarities and differences for L-BDG2, L-BDGPRO2, and RR-SEL-REP2: These models are electrically and mechanically identical and use the same base firmware. The difference between them is the software programmed in each of the product models to permit use in unique Lutron systems. Marketing differences are listed by model below.

The differences in the models:

- Do not change the fundamental RF characteristics
- Do not degrade the unwanted emissions of the certified product
- Do not change the physical characteristics
 - The same PCB is used in all models
 - The same enclosure is used in all models
 - The same RF and non-RF components are used in all models

L-BDG2: Is the base Model for Lutron Caseta system

L-BDGPRO2: Model sold as part of a kit with additional Lutron Caseta devices and allows support of Lutron Shades and integration with select A/V and Security Systems.

RR-SEL-REP2: Model is used for the Lutron RA system as a wireless hub for the lighting controls

The PRO level design allows for more features in the system to be added for the Caseta system where the base model (L-BDG2) allows for basic system features the PRO allows for more connectivity such as to third party AV and security systems. The Radio Ra level design is for our Radio Ra system which has additional features and is system for a higher end solution.

Applicant

Company Name: Lutron Electronics Co., Inc.
Address: 7200 Suter Rd. Coopersburg, PA 18036 U.S.A.
