RE: Model Difference Declaration:

- [FCC ID: JQ6-SWAZ0](#)
- [\(EUT Models: Zevon Omni, Zevon Direct\)](#)

We, [HID Global Corporation](#), hereby declare that the products Zevon Omni and Zevon Direct covered under FCC ID: JQ6-SWAZ0 and are electrically identical.

Both models share the same:

- Schematic
- PCB layout
- Electronic components
- Firmware and software
- Operating frequencies, modulation methods, and output power

The only differences between the models are:

- The antenna used for the UWB radio.
- The product enclosure (mechanical design only)

Model differences are as follows:

- Zevon Omni – equipped with an omnidirectional antenna
- Zevon Direct – equipped with a directional antenna
- Enclosure modified according to the antenna used

The submitted test report provided by the accredited test laboratory covers both models, including the different antenna. Testing was performed to represent the worst-case configuration, and the results demonstrate compliance for both Zevon Omni and Zevon Direct with all applicable FCC requirements.

Sincerely,

Signature:
