

TELEMETRY-ELECTRONICS CONSULTANTS
932 E. IMPALA AVENUE ☒ MESA, ARIZONA 85204-6699
U.S.A. (480) 892-4444
FAX (480) 892-9139

Date: 19 March, 2002

Reference: FCC Submittal Confirmation Number **EA140166**

FCC ID: **JYLMK9A**

Telonics, Inc., requests that, pursuant to rule section 0.457 and 0.459, the following attachments to the aforementioned submittal be held confidential:

- Schematic Diagrams (Appendix A)
- Circuit Function Descriptions (Appendix B)
- Test Procedures (Appendix C)
- Interior Photographs, top and bottom (Appendix D)

The above listed information is currently held as company confidential and is disclosed to the Commission for the sole purpose of this submission, to provide Commission personnel the necessary technical data required to adequately consider this submission. It has not previously been disclosed to any third parties.

This request is necessary because the specified information contains information which is currently held as company proprietary, and if disclosed to public record, would result in loss of competitive edge in a specialized, competitive marketplace resulting in financial loss to the submitter. Further financial loss would result from disclosure to third parties. Specific to this product are the design approaches utilized to achieve temperature stabilized, RF carrier synthesis at very low power and at low voltage. Additional proprietary information is divulged to the Commission by means of the circuitry and circuit function descriptions, regarding the methodologies employed to successfully convey RF energy to electrically foreshortened, non-resonant antennas.

We request that this material shall not be made available for public disclosure for a period of ten (10) years for the reasons listed in the previous paragraph.

Respectfully,

David W. Beaty
Managing Director,
Telonics, Inc.
