

The rear panel of the 15-6000S receiver features a variety of ports and connectors. On the left, there are two antenna inputs labeled ANT 1 and ANT 2, a ground screw, and a REF IN (1.5M-Ω) input. Below these are several output ports: RX OUT, RX IN, ANT OUT, DRV, KEY PAD, AGC 2, REMOTE, METER, and KEY. A DC 13.2V power input is located on the right side. A label on the right side of the panel provides technical specifications and contact information. Other connectors include a USB port, a COM port, an EXT SP 80 speaker output, a DISPLAY port, and a LAN port. A small digital display is also visible on the right side of the panel.
