To: Sharon Hoffman

Regarding to your request information about what is the different between Yaesu models number VX-110 and VX-150. The only differences are the keypad locates at the front of the radio. The VX-110 has 8 keys and the VX-150 have full 16 keys pad. All other electronics aspect of the radios is the same. We would like them to be listed together in the same list. If you have any more questions please contact me Johnathan Pham at Yaesu USA.

Best regards,

Johnathan Pham
