

Operational Description

This device is a Wireless 2.4GHz MiniPCI RF Module which operates in the 2.4Ghz frequency spectrum with throughput of up to 54Mbps which OFDM technique will be applied. If the signal to noise ratio is too poor which could not support 54Mbps, the 11Mbps data rate with CCK technique will be applied. This project is seeking the authorization of limited module approval specific to the mobile device such as access point and router.

The transmitter of the EUT is powered by host equipment via a mini-PCI interface. The antenna is Dipole antenna with UFL connector.

The other instruction, please have a look at the users manual.
