

Photograph E-1 - Vertical Polarization (1-18 GHz)

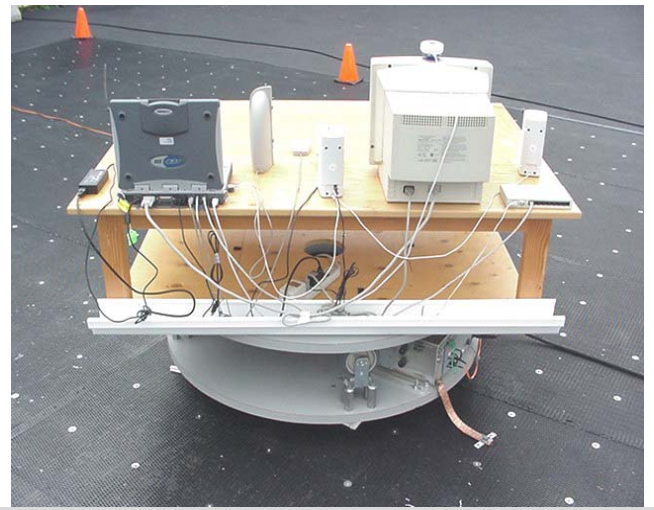

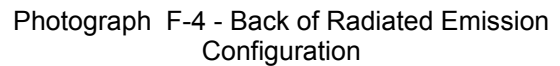

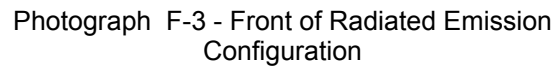

A photograph of a mobile robot platform, likely a Pioneer 3-DX, equipped with a custom-built wooden structure. The structure consists of a top platform and a lower shelf. On the top platform, several electronic components are mounted: a CRT monitor, two small speakers, a laptop, and a mouse. A robotic arm is attached to the right side of the robot. The robot is positioned on a dark, textured surface, possibly asphalt.

A mobile robot platform, consisting of a grey circular base with four omni-wheels, is shown. On top of the base is a light-colored wooden table. The table holds a desktop computer system: a CRT monitor, two small white speakers, a laptop, and a mouse. The entire setup is on a dark, textured floor.

Applicant:	Itronix Corporation	Model:	IX260PROA555BT	IC ID:	1943A-IX260Pb	FCC ID:	KBCIX260PROA555BT
Rugged Laptop PC with Intel Pro 2200BG 802.11b/g WLAN, Cirronet BT2022 Bluetooth, & Dual-Band CDMA
