

USER OPERATION INSTRUCTION (DRAFT)

KEY FREE SYSTEM

The key free uses coded radio signals to communicate with the vehicle.

When the key free is near the vehicle such as in your pocket or purse.

It allows the vehicle to be locked unlocked, or started without inserting the ignition

Key. It is also possible to use the control entry function.

△ CAUTION

- Be sure to carry the key free with you.
- Do not leave the vehicle with the key free inside.

- The key free may not function correctly depending on the environment or operating conditions, if you do not use it correctly.
- The key free transmits faint radio waves.
 - When there are strong signals coming from a television tower, power station or a cellular phone with you.
 - When the key free is in contact with or covered by a metallic material.
 - When radio wave-type remote control entry is used nearby.
 - When the key free is placed near an electric appliance such as a personal Computer.

- The key free continually consumes battery power as the key receives a signal to communicate with the vehicles.
- Battery life is about 2 years, although it varies depending on the operating conditions. When the battery of the key free is low,
 - If the battery runs down, replace it with a new one.
- If the key free receive strong signal over an extended period of time the Battery could quickly run down. Do not place the key free near an electric appliance such as a television set or personal computer.
