Tom, I have reviewed the above referenced application and find that the following items need to be addressed in order to complete the review:

1. Please provide a label location drawing/photo.
2. The Frequency Range is at set channels 911.58, 914.58, 917.58 MHz per manual but 903.8-926.2 MHz from report. Please clarify this discrepancy.
3. Please provide a clear indication of the test procedures used for the measurements in the test report.

Best regards,

Chris Harvey

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
