Dear Mr. Chan:

In response to your inquiry, I have prepared the following reply:

Item #1

I have uploaded several photos that indicate the operating configuration and exposure conditions of the hip-mount use of this transceiver. It is used in the LXE Model MX3 and CX1 terminals which are identical in form factor. Therefore, the photographs are representative of each terminals.

Item #3

I have revised the statement to read as follows:

<p>Caution</p> 	<p><i>This device is intended to transmit RF energy. In accordance with FCC radio-frequency safety regulations, when operating this device with the Hip-Flip accessory, it should be used in accordance with the users instructions. Additionally, the user should take care to ensure that a minimum separation distance of 20cm is maintained from the antenna to nearby persons. Use of this device in a manner not consistent with these instructions can increases the risk of RF exposure.</i></p>
---	---

Sincerely,

R. Sam Wismer
RF Approvals Engineer
LXE, Inc.
