

Overall Description of Application

There are 10 products falling under 7 previous certifications that are affected by this application.

Section 2.929(d) of the rules states:

“In general, new applications for each device will not be required. A single application for equipment authorization may be filed cover all the affected equipment.”

Aln order to accommodate this under the FCC electronic application process, 7 separate applications are having to be submitted and uploaded (from discussions with Diane Poole). However, no additional fees will be necessary as this was covered by the original application submitted under FCC ID: KJ8INTRMT, EA98954, 10/04/2000.

As stipulated by 47 CFR 2.933, the following has been provided: description of original equipment, a copy of the previously approved grant of authorization, external photographs, and labeling information.
