

Pre-drill a 5/64 pilot hole 3/4" deep

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a residential environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions manual, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit separate from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Pre-drill a 5/64 pilot hole 3/4" deep

**Drilling Template
For Keyless Entry**

CAUTION: The keypad should be mounted at a minimum of 5 feet from the floor to keep it out of the reach of small children.

Two screws are included for proper mounting into wood or other similar material. If you're mounting into some other material, consult a building contractor to insure proper hardware used for a secure mounting.

Once you have determined

the mounting location, use the provided drilling template to determine hole positions and drill 5/64" pilot hole 3/4" deep for the two mounting screws.

Snap open the Keyless Entry case with a coin. Separate the front case from the back case. Mount the back case and secure with screws provided. Do not over tighten the screws as this may bend or damage the back case. Install and snap the front case onto the back case. Remove paper backing from "Changing Personal Identification Number" label and apply label to a clean surface inside garage.
