EchoPoint MobileReader SMR-640P-101

Federal Communications Commission (FCC) Notice

The Federal Communications Commission has established technical standards regarding radio frequency energy emitted by computer devices. This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference with radio/TV reception. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Changes or modifications to this equipment that are not expressly approved by Savi Technology could void the warranty and the authority to operate this equipment.

Savi Technology is not responsible for radio/TV interference caused by using unauthorized cable or by making unauthorized changes to this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Portuguese	Savi Technology, Inc. declara que este SMR-640P-101 está conforme com os requisitos essenciais e outras disposições da Directiva 1999/5/CE.

I. Introduction

The EchoPoint SMR-640P-101 MobileReader is a compact, lightweight, attachment unit that can be used with many off the shelf handheld or notebook computer, providing a simple wireless communication with all EchoPoint 600/640 tag product series.

The SMR-640P-101 MobileReader includes the following items:

- RFID Pod unit with integrated antenna, rechargeable battery and serial cable with standard RS232C, DB-9 connector
- Handstrap mounting clip (optional)
- AC to DC wall adapter (110/220V) for charging internal reader battery

II. Battery Charging

Before using the SMR-640P-101 MobileReader it is strongly recommended to fully charge the unit's internal battery.

Note that the unit's internal battery is not user replaceable.

To charge the battery use provided AC to DC wall adapter and connect it to the unit's power jack as shown on the following picture.

It is important to use Savi provided adapter to ensure correct battery charging and to avoid overheating of the unit.

Note that there is no visual indication signaling when the RFID Module battery is fully charged therefore it is recommended to connect unit to the handheld computer to observe the current status of the battery charging.

Depending on the remaining battery charge the charging might take up to 1 ½ hours.

III. Communication with the PC

The SMR-640P-101 MobileReader can be connected to any computer equipped with standard RS232 interface.

The reader is configured as a DCE device and therefore does not require NULL modem adapter when connected to the PC.

IV. Using the RFID SMR-640P MobileReader

The following pictures show examples of connecting and using the reader with off the shelf handheld device.

When using the SMR-640P MobileReader for scanning EchoPoint tag(s) it is recommended to keep hand off of the top unit's cover for best communication range.

SMR-640P MobileReader connected to PDA handheld

V. Using the RFID application

A simple RFID application is provided to demonstrate a typical application using the EchoPoint SMR-640P-101 MobileReader.

The following pictures show the basic features and steps on how to scan (collect) tags.

Using the pen tap on the **Start** button

Step 2.

Tap on **Scan** function to collect nearby tags (at the distance of up to 3 feet)

Step 1.

Before performing the **Scan** function tap on **Initialize** function first to configure RFID module

Shortcut icon for **Initialize** function

Shortcut icon for **Setup** function

Tap on **Tools** and pull up menu will appear

Shortcut icon for **Scan** function

Use **Exit** icon to terminate application.

Warning!

The **X** icon on the top right corner of the application window is used only to minimize the application.

To change system parameters select **Setup** from the pull up menu when tapping on the **Tools** icon in bottom left corner.

To allow handheld to receive 'other' tags (beacon, alarm or interrogated by other Signpost) clear the Signpost filter check box.

User Properties such as Signpost ID uniquely define RFID module during the RF communication.
