

ANNEX for BLE Evaluation Exemption

Model: UWBBLE22

FCC ID: KR5UWBBLE22

IC: 7812D-UWBBLE22

According to § 1.1307(B)(3)(I)(B), a device is exempted from routine evaluation if below is fulfilled:

(B) Or the available maximum time-averaged power or effective radiated power (ERP), whichever is greater, is less than or equal to the threshold P_{th} (mW) described in the following formula. This method shall only be used at separation distances (cm) from 0.5 centimeters to 40 centimeters and at frequencies from 0.3 GHz to 6 GHz (inclusive).

P_{th} is given by:

$$P_{th} \text{ (mW)} = \begin{cases} ERP_{20 \text{ cm}} (d/20 \text{ cm})^x & d \leq 20 \text{ cm} \\ ERP_{20 \text{ cm}} & 20 \text{ cm} < d \leq 40 \text{ cm} \end{cases}$$

Where

$$x = -\log_{10} \left(\frac{60}{ERP_{20 \text{ cm}} \sqrt{f}} \right) \text{ and } f \text{ is in GHz;}$$

and

$$ERP_{20 \text{ cm}} \text{ (mW)} = \begin{cases} 2040f & 0.3 \text{ GHz} \leq f < 1.5 \text{ GHz} \\ 3060 & 1.5 \text{ GHz} \leq f \leq 6 \text{ GHz} \end{cases}$$

d = the separation distance (cm);

This device is $d=10$ mm close to the human body, the corresponding threshold $P_{th}=10,39$ mW. Since the product has a maximum output power of only 2.8 dBm (1.9 mW) then it's exempted from evaluation.

Best Regards,

Abdellah Ahakki
