Date of Original Email: 09/11/2003 to Mr. R. Leschhorn

Subject: Disabled Transmission in the 328.6 to 335.4 MHz Band

Dear Mr Leimer:

Thank you for your request for clarification. As part of the new M3xR family of software defined radios, many functions of this radio are enabled entirely through firmware. Hence for this version, FCC ID: KVVW61020307, transmission in the frequency range from 328.6 to 335.4 MHz shall be inhibited via a change in the control firmware of the radio that prevents selection of the frequencies in this range.

If there are any further questions, please contact us.

Sincerely,

A handwritten signature in black ink, appearing to read 'Peter Foulger', written over a horizontal line.

Peter Foulger
President
