

RF Technologies Inc.
Quick Response Nurse Call with Check In
Models 0800-0539, 0800-0540, 0800-0541, and 0800-0542
FCC ID: KXU-PCFSZ242
IC: 2719A-PCFSZ242

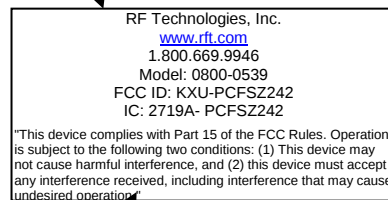

These units are professionally installed against the wall. The installer will mount the back plate to the wall before attaching the main unit to the back plate with a screw at the bottom of the main enclosure. For long-term visibility of the compliance label – it is installed on the inside of the back plate, rather than the back side, which would be against the wall. It is a permanently visible label whenever the batteries are changed.

See Internal/External Photos for exact label placements.
