

LETTER OF ATTESTATION FOR PERMISSIVE CHANGE

FCC Authorization & Evaluation Division
7435 Oakland Mills Road
Columbia, Maryland 21045-0429

Ladies and or Gentlemen:

The Seeker Tag is similar to the one tested March 2005 (FCC ID: KXU-SEEK01). Changes made to the sample include a new (spring wire) antenna instead of the original micro strip antenna and a higher capacity battery was put into the assembly. The antenna change was made to accommodate the higher capacity battery. The antenna length is of the same length as the previous antenna. The transceiver design and components remain the same, including the rated power output.

Regards,

Gregg Haensgen
