

1815W Series Internal Assembly

Top Side Board

The image shows the internal components of a Cisco WS-C3548-CL-K9 3548 Catalyst switch. The main processor is a 3548 Catalyst switch chip, which is a 32-bit RISC processor. The board also features a 3548 Catalyst switch chip, a 3548 Catalyst switch chip, and a 3548 Catalyst switch chip. The board is populated with various components, including capacitors, resistors, and integrated circuits. The board is green with gold-plated components and is placed on a blue grid background with a ruler for scale.

Top Side Board without Shields
