Pursuant to sections 0.407(d)(1)(ii) and 0.459 of the Commission's rules, this letter requests confidential treatment of following material filed in support of the above-referenced application. Cisco requests the following documents be confidential

- Theory of Operation, including the list of radio parameters
- Schematics
- Block diagram.

The information contained in the document presents information about a Cisco product that is being certified for commercial development. If competitors were to have access to this document both before and after release, they would have knowledge of Cisco's proprietary technology and would be able to use this advance knowledge to their advantage. This could result in substantial competitive harm to Cisco's ability to bring future product to market, should that decision be made.

1. Identification of any measures taken by the submitting party to prevent unauthorized disclosure.
 - Information about Cisco's products whether under development or in production is considered by the company to be commercially sensitive information that employees are not permitted to discuss outside the company.
2. Identification of whether the information is available to the public and the extent of any previous disclosure of information to third parties.
 - Information about product development is not routinely provided to the public, and is not available on Cisco's web site. No information about this product has been disclosed.
3. Justification of the period during which the submitting party asserts that material should not be available for public disclosure.
 - Cisco requests that the above-identified material be held permanently confidential.

Sincerely,

Fred Leffingwell Sr. EMC Engineer Cisco Systems, Inc.
