Re: Medtronic, Inc.
Non-Routine Confidentiality Request
FCC ID No.: LF524965

To whom it may concern:

We understand Internal Photos are not typically held confidential, but may be eligible for confidentiality in certain circumstances. Confidentiality for this information may be granted in the following circumstances

- Internal photos of a non-consumer device may be held confidential if the device is not accessible to the general public.

Medtronic, Inc. ("Medtronic") requests that the internal photos pertaining to the above-referenced application be withheld from public disclosure in accordance with Section 0.459 of the Commission's Rules, 47 C.F.R. § 0.459 (2001), following grant of the application. In support of this request, Medtronic submits the following:

Medtronic's Patient Connector, which is the subject of this future filing, is not available to the public. It is used by health care professionals only with a need to communicate with a patient's implanted Medtronic device. Health care professionals are required to restrict access to the Patient Connector through agreements designed to prevent public disclosure and/or tampering with the Patient Connector. In addition to the agreements, opening the device is not user-friendly. A label hides three Torx screws and the label must be perforated in three locations to gain access to the interior.

It is with this understanding that we respectfully request the Agency to honor our request to maintain internal photos confidential.

Respectfully,

Michael Green
