

2.0 APPLICABLE DOCUMENTS

The following documents form a part of this report to the extent expressed herein:

FCC Code of Federal Regulations Title 47, Part 15,

FCC Procedure for Measuring RF Emissions from Computing Devices FCC/OET MP-4, July 1987

ANSI C63.4-1992

FCC Characteristics of Open Field Test Sites Bulletin
OET 55, October 1989

3.0 TEST SITE DESCRIPTION

This testing was performed at Rubicom Systems, Inc. 3-meter open area test site. The description of the measurement facility was found to be compliant with the requirements of Section 2.948 of the FCC Rules. A copy of the compliance letter is attached to this report as Appendix A.

3.1 Environmental Conditions

Environmental conditions during testing of the EUT were as follows:

Date: **November 12, 1998**

Date: **November 13, 1998**

Temperature: **82°**

Temperature: **72°**

Barometer: **27.50 inches**

Barometer: **29.78**

Humidity: **75%**

Humidity: **78%**

5.0 TEST SAMPLE SETUP AND CONFIGURATIONS

The Nasaco Electronics Jensen 120NTX Wireless was placed on the nonconductive 80cm high manual turntable. The unit was configured with an HP 6291A power supply. Cables were configured in a normal setup.

Setup for the Jensen 120NTX Wireless is shown below.

The Jensen 120NTX Wireless test setup is shown in Photos 1 through 3.

6.0 PROCEDURES AND RESULTS

6.1 Radiated Emissions

Figures 6.1-1 through 6.1-10 present the pre-scans in the 30MHz-10GHz range during Electric Field testing in the enclosure. There were no signals detected from the transmitter below 914MHz. Tabulated data for all signals detected are listed in this section. Table 6.1-1 for average and Table 6.1-2 for peak values. All testing from 30MHz to 10GHz was performed on the 3 meter site.

An example of calculations are as follows:

Meter Reading	20 dB μ V
Antenna Factor	+16 Conversion Factor
Cable Loss	+2 Correction Factor
Result	+38 dB μ V/m

The spectrum analyzer memory card contains the correction factors for calibrated cables and antenna factors. When external attenuation is required the reference level is offset during test.

Figures 6.1-11 through 6.1-25 present plots of the radiated data over the range of 30MHz-10GHz. The exact levels of signals detected and maximized are presented in the tabulated tables mentioned above.

Figures 6.1-26 through 6.1-41 are the ambient profiles for the 30MHz-10GHz radiated measurements.

6.2 Conducted Emissions

Power line conducted data is presented in Figures 6.2-1 and 6.2-1. No failures were experienced during the conducted testing. No modifications were required throughout this test effort

CERTIFICATION

Rubicom Systems, Inc. (RSI) certifies the information obtained in this report was performed consistent with the requirements of ANSI C63.4-1992. The Nasaco Electronics, Jensen 120NTX Audio Transmitter complies with the requirements of CFR 47 Part 15.249 Subpart C for intentional radiators.

This data was obtained after a prescan of five Jensen 120NTX Wireless units. The Jensen 120NTX, s/n: 843A0006, was selected by Nasaco Electronics and is described in Paragraph 1.3 of this document. Any modifications to the unit as tested may invalidate the data and void this certification.

 11/18/98
Joseph G. Barbee
President

ABSTRACT

This report presents test results of the emanations found emitting from the Nasaco Electronics, Jensen 120NTX Wireless Audio Transmitter and the comparison of these emissions to the requirements of the FCC, Title 47, Part 15.249 Subpart B for intentional Transmitter.

This testing was performed on a 3-meter open area test site at Rubicom Systems, Inc. The testing was performed for Nasaso Electronics under purchase order 60739 and is filed under JA-1613 at RSI. The results of this test effort demonstrate compliance of the Jensen 120NTX Wireless Audio Transmitter to the CFR Title 47, Part 15.249 Subpart B, intentional transmitters.

The unit under test was a Jensen 120NTX Wireless Audio Transmitter, s/n: 843A0006.

1.0 INTRODUCTION

1.1 Purpose

The purpose of this report is to show compliance of the Nasaco Electronics Jensen Wireless Audio transmitter to the requirements of the FCC Rules and Regulations (CFR Title 47, Part 15.249) for intentional transmitters operating in the 902-928MHz range. The tests were performed on a three meter site.

1.2 Requirements

The test requirements are as follows:

RADIATED (15.209a) (15.205)

<u>Freq. (MHz)</u>	<u>3 Meter Field Strength $\mu\text{V}/\text{M}$</u>	<u>3 Meter $\text{dB}\mu\text{V}/\text{M}$</u>
30 - 88	100	40
88 - 216	150	43.5
216 - 960	200	46
960 - Above	500	54 Avg 74 Peak

CONDUCTED

<u>Freq. (MHz)</u>	<u>μVolts</u>	<u>$\text{dB}>\mu\text{V}$</u>
.450-30MHz	250	48

RADIATED (CFR 15.249a)

	<u>Field Strength 3 Meter</u>	<u>3 Meter $\text{dB}\mu\text{V}/\text{m}$</u>
Fundamental	50 Millivolts	94
Harmonics	500 Microvolts	54

1.3 Unit Under Test Description

The Nasaco Electronics Jensen 120NTX Wireless Transmitter is an audio transmitter operating at 915MHz. The Jensen Wireless transmits audio to wireless speakers or headphones. The unit is powered by 12VDC supplied by an HP 6291A DC power supply.

1.4 Summary of Results

Data is presented in Paragraph 6.0. The Jensen 120NTX Wireless Audio Transmitter was found to be compliant to the requirements of CFR Title 47, Part 15.249.
