Safety precautions
The device complies with the IC Rules (FCC Rules: Unintentional radiators - Part 15) and IC Rules (IC Rules: Unintentional radiators - Schedule 7). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Notes
The IC normative rules require the user to be informed that interference to radio communications may result in the user being required to take whatever measures may be necessary to correct such interference at their own expense.

Bluetooth
The device complies with the Bluetooth Specification v5.0. The device is a Class 2 device (transmit power ≤ 97.7 mW). The device is interoperable with Bluetooth devices that comply with Bluetooth Specification v2.0 or later, and that support the following profiles: OPP, A2DP, AVRCP, HSP, HFP and mandatory services (HCI, L2CAP, SDP).

Common operation
How to use the buttons
Playback (unattended)
Operate the unit as usual.

Playback (attended)
1. Operate the unit as usual.
2. Turn on both the unit and the audio device.
3. Connect the unit to the AC power outlet.
4. Press the POWER/FUNCTION button to turn on USB mode with USB PLAYER indicator on.
5. Connect the DC plug of the AC adapter to the DC-IN jack.
6. Turn on both the unit and the audio device.
7. Operate the unit as usual.

Playing records
The REC indicator lights up, and it starts recording the music from the record.

Replacing the cartridge from the tone arm
The stylus cover is not included. A 3.4 mm turntable screw is on the other side of the cabinet.

规格

LINE IN operation
The device can be used as a stereo amplifier to operate external audio devices. This software operates as a Bluetooth® audio receiver, to which Bluetooth® audio devices are connected. The device can be used as a stereo amplifier to operate external audio devices. This software operates as a Bluetooth® audio receiver, to which Bluetooth® audio devices are connected.

LINE OUT operation
You can connect the device to the LINE OUT jack of an external audio device to use the device as a subwoofer. The device can be used as a wireless subwoofer to operate external audio devices. This software operates as a Bluetooth® audio receiver, to which Bluetooth® audio devices are connected.
