SUBJECT : Confirmation for test modification on our ELT models ADT 406
(Request for Equipment notification)

Dear Sir,

By this letter we, ELTA , confirm that all the modifications found during the qualification process (tests) will be implemented into all production units.
This rule is part of our Quality plan and specially apply for all the Aeronautic equipment such as the ELT (Emergency Locator transmitter).

Our basic development is as follow:

- Design,
- Internal tests and verification
- Qualification test
- Design file evolution following qualification tests
- Pre production run
- First article Inspection
- Update of design and production file.

Any evolution are approved by the French DGAC (Airworthiness Authority in France, equivalent to FAA). French DGAC will inform FAA on these modifications.

C. CRESP
