SUBJECT : RF Exposure for our ELT models ADT 406 S (Request for Equipment notification)

Dear Sir,

Our new Emergency Locator Transmitter (ELT) model ADT 406 S is the Survival model of the ADT406 family. This model is directly derived from the ADT406 AF/AP and ADT406 AP models.

This equipment is not a mobile phone. It is a Distress Beacon transmitter operating on the international distress frequencies 121.5-243-406 MHz. It's used only in case of grave and imminent danger, such as an Aircraft crash.

We confirm that the RF exposure are not applicable to this Emergency Equipment.
