

As your e-mail dated june,21, we have tested the EUT antenna gain as following (this page).
The antenna dimension and the photo as next pages. The plot indicate the dBm axial value right side. We used the substitution method compare to the other reference Horn Antenna, the reference level for 0dBi is -5dBm.

Antenna Specification :

Model NO.	W250-0101B
Antenna Type.	Mono Dipole Antenna
Antenna Gain	1.82dBi

Model No: MONO DIPOLE H

Frequency 2400.00 MHz

Test engineer: mi

Traininig Research Co., Ltd.
